

# Stops Dead Batteries

Sure-Start Control Module

**SURE-START** shuts off Battery Power before damaging discharge levels occur when the engine is turned "OFF" and an auxiliary device (i.e. dome light, head lights, etc) is left in the "ON" position.

## Simple Design

Installs in the vehicle's engine compartment  
Utilizes existing battery cables  
No cutting or splicing required  
Typical installation takes 10 minutes  
All inclusive kit

Typical Installation

## Programmer Friendly

Programmable values include:

- Two turnoff thresholds for both heavy & lite duty electrical loads
- Automatic reset
- Run sensor
- Threshold timer
- Shutdown delay
- Reset voltage

## Battery Protection Peace of Mind
